

Environmental Policy

GTE Track Spray Pty Ltd provides specialised herbicide control of vegetation for rail corridors. Our vehicles are purpose built road/rail vehicles which can drive on tracks spraying herbicides, or alongside rail lines spraying fire breaks, level crossings, yards and sidings.

As part of our commitment to achieving the principles of responsible environmental management, sustainability and protection of the natural environment in our workplace and in order to minimise our impact on the environment for generations to come GTE Track Spray has developed and implemented an Environmental Management System that complies with the Environmental Management Standard AS/NZS 14001: 2015.

The Environmental Management System is defined in documented management procedures, which provide clear standards and guidelines in all the appropriate areas of the company's activities.

We are committed to pursuing industry specific best practice in environmental performance as we acknowledge that our shareholders, employees and the community at large expect responsible environmental practice by our business.

Specifically GTE Track Spray is committed to:

- ✓ Conducting our operations to minimise environmental risk and, wherever practicable, eliminate adverse environmental impacts
- ✓ The protection of the environment and the setting of rigorous environmental objectives
- ✓ Fulfilling our compliance obligations in regard to relevant environmental legislation, regulations, standards and codes of practice as the absolute minimum requirement
- ✓ Conducting business with organisations who have a commitment to the values and objectives contained in this environmental policy
- ✓ Continual improvement of the environmental management system to enhance environmental performance

Through communication and training, our employees and contractors will be encouraged and assisted to enhance GTE Track Spray environmental awareness and performance.

All GTE Track Spray personnel are required to work towards the fulfilment of the Environmental Management System, and management will regularly review this policy, and the other elements of the system, in order to maintain its suitability and effectiveness.
